

AZFAB Aggregate Material Testing

AZFAB offers comprehensive aggregate material testing services to assist in the process design and performance evaluation for AZFAB equipment. Our in-house lab testing programs help ensure that every system we design is precisely matched to fit your production goals and material characteristics.

Testing may include gradation analysis, sand equivalencies, durability index, bulk specific gravity, attrition scrubbing, and polymer evaluation, as well as optional certified third-party tests such as microscopic examination, acid solubility, ISO crush K-factor, and full ISO workups.

- Submitting Samples:
 - Provide a minimum of one full five-gallon bucket of representative material.
 - Include a completed AZFAB Lab Data Sheet in a sealed zip bag inside your shipment.
 - Email a scanned copy of the form in advance to contact@azfab.com or fax to 520-744-4091.
 - Samples are processed on a first-come, first-served basis.
- Shipping Address:

*AZFAB
1762 W. Grant Rd.
Tucson, AZ 85745*

Freight and shipping costs, including any return of material, are the responsibility of the customer. Testing fees for AZFAB equipment design are credited upon purchase of qualifying equipment.

For questions or to schedule testing, contact our Tucson office at 520-572-7239 or visit www.azfab.com.
